

# Software Developer     C#.NET & SQL Server

Gordon Associates is a Cheltenham-based software house with 20 staff that provides bespoke application development services across a number of sectors and also provides a market-leading business management portal to exam boards and awarding bodies. See [www.gordonassociates.co.uk](http://www.gordonassociates.co.uk) and [www.parnassusonline.com](http://www.parnassusonline.com) for further information.

We require a developer to work in the bespoke development team, with excellent analytical and technical skills, who is capable of implementing a project from start to finish.

The role would also suit a graduate or final year student who is willing to learn quickly. Obviously, in this situation, the below responsibilities/skills would be the ultimate goal, rather than the initial requirement.

## **Responsibilities would include:**

- Liaison with customer
- Scoping studies / requirements analysis / product gap analysis
- Project management in terms of man-days (not commercial)
- Software development
- Installations
- Testing
- Data migration
- Building reports
- Informal Training / Handholding while new system gets bedded in
- Consultancy
- Ensuring appropriate project related documentation is kept up to date
- Maintaining an up-to-date knowledge of new technologies/methods

## **Technical skills (Microsoft-based):**

- .NET
- C#
- VB
- SQL Server
- SQL Server Reporting Services
- Windows-based applications
- Web-based applications
- TFS

Very occasional out of hours working is required as part of the job.

This is a varied role for a small, growing business, which would suit a strong candidate who is keen to work on a wide cross-section of systems and be involved in all aspects of the project.

SALARY: negotiable
